CORONAVIRUS DISEASE 2019 (COVID-19)

March 4, 2020

The Centers for Disease Control and Prevention (CDC) has just issued updated travel guidance for Italy, South Korea, and Iran which have been categorized as a **Level 3 Travel Warning**. This means there is widespread community transmission of respiratory illness caused by the novel Coronavirus (COVID-19) and individuals should avoid nonessential travel to these countries.

<https://www.cdc.gov/coronavirus/2019-ncov/travelers/after-travel-precautions.html>

<https://wwwnc.cdc.gov/travel/notices/warning/coronavirusitaly?from=groupmessage&isappinstalled=0>

For travelers coming from any of these countries as well as from mainland China and returning back to the United States, individuals should stay home for 14 days from the time of departure from an area with widespread, ongoing community transmission of respiratory illness caused by the Coronavirus (COVID-19) (Level 3 Travel Health Notice countries) and should also practice social distancing (see below).

Steps to monitor your health and practice social distancing:

1. Take your temperature with a thermometer two times a day and monitor for fever. Also watch for cough or trouble breathing.
2. Stay home and avoid contact with others. Do not go to work or school for this 14-day period. Discuss your work situation with your employer before returning to work.
3. Do not take public transportation, taxis, or ride-shares during the time you are practicing social distancing.
4. Avoid crowded places (such as shopping centers and movie theaters) and limit your activities in public.
5. Keep your distance from others (about 6 feet or 2 meters).

What To Do If You Get Sick

If you get sick with fever (100.4°F/38°C or higher), cough, or have trouble breathing:

- Seek medical care. Call ahead before you go to a doctor's office or emergency room.
- Tell your doctor about your recent travel and your symptoms.
- Avoid contact with others.

If you need to seek medical care for other reasons, such as dialysis, call ahead to your doctor and tell them about your recent travel to an area with widespread or ongoing community spread of COVID-19.

Currently a vaccine or drug is not available for COVID-19. Community-based interventions such as school dismissals, event cancellations, social distancing, and creating employee plans to work remotely can help slow the spread of COVID-19. Individuals can practice everyday prevention measures like frequent hand washing, staying home when sick, and covering coughs and sneezes.

Governor Baker announced today that he is urging students not to travel abroad which we support and agree with based on the rapidly evolving situation. Also, if you are immunocompromised or elderly with potential underlying health issues you should consider reviewing your needs to travel internationally to countries with Level 2 (Japan) COVID-19 Travel Warnings. Please note that these travel advisories are fluid and other countries may be added at any time (please check our website or CDC website). For Individuals who must travel to countries with Level 2 (Japan) or Level 3 COVID-19 Countries of Risk. Please see the following travel recommendations:

- Avoid contact with sick people.
- Avoid touching your eyes, nose, or mouth with unwashed hands.
- Clean your hands often by washing them with soap and water for at least 20 seconds or using an alcohol-based hand sanitizer that contains at least 60%-95% alcohol. Soap and water should be used if hands are visibly dirty.
 - It is especially important to clean hands after going to the bathroom; before eating; and after coughing, sneezing or blowing your nose.
 - Supplies of hand sanitizer, tissues, and other hygiene products may be limited, so consider bringing them with you.
- Stay home and monitor your health for 14 days after returning to the United States.
- Avoid traveling if you are sick.

People should be prepared for the possibility of a COVID-19 outbreak in the Wayland community. However, the community can take measures to reduce the spread of COVID-19. **There is new guidance that is now included on our website from CDC on preventing spread to communities and how to prepare and take action for COVID-19; at home or work, at school/college, for large gatherings and faith based settings, First Responders, and Health Care Professionals.**

As we have expressed this is a rapidly evolving situation and we encourage you to check our website periodically for new information www.wayland.ma.us/health-department, we will be updating it regularly.

Sincerely,

Julia Junghans, Director of Public Health
Town of Wayland

Ruth Mori, MSN, R.N., Public Health Nurse
