Town of Wayland Land Construction History Map

Data Classes are calculated using the *Equal Class Frequency* Method. In other words, each class contains approximately the same number of houses built during a specific time period. For example, between 1638 and 1900, about 500 houses were constructed within the Town of Wayland limits. The same number of houses were constructed during the post-war 1953-54 interval. Houses built prior to 1901 are labeled on the map.
