Re: Interest in Serving on the School Committee to Fill Vacancy

Board Members:

Please consider my interest in appointment to Wayland's School Committee to fill the current vacancy for its unexpired term ending at the conclusion of the 2024 Annual Town Meeting.

As to my educational qualifications, I was a good and dedicated student attending Deerfield Academy for high school, Harvard College as an English major, Boston University for both law and business degrees and New York University for an advanced, law degree in taxation.

**I believe that it's important for School Committee members to have a demonstrated appreciation for academics.**

As a professional, I practiced law for several decades in both large and small firms and had the opportunity to assist with the problems and circumstances of similarly large and small clients. Combined with my personal and investment life, I have wide experience with life's opportunities and challenges. Perhaps most relevantly, I am a parent of a son who grew up in Wayland and went through our school system - graduating from Wayland High School in 2010.

**I believe that it's important for a School Committee member to appreciate the practicality of education as the means to the end of our children living a "good" life.**

And as a now senior citizen at 68 and 23-year town resident, I am concerned with changing the entrenched perspective that Wayland is a town you move into for its schools and afterwards abandon because of its taxes.

**I believe that it's important for School Committee members:**

- (1) to keep in mind the interests of all citizens of Wayland in the operation of its schools, and**
- (2) to foster a sustained sense of community and belonging in both our children and their parents.**

It would be my honor to serve on Wayland's School Committee.

Sincerely,

Steven M. Glovsky
