**B. Findings**

1. Findings pursuant to the Massachusetts Wetlands Protection Act  
 Following the review of the the above-referenced Notice of Intent and based on the information provided in this application and presented at the public hearing, this Commission finds that the areas in which work is proposed is significant to the following interests of the Wetlands Protection Act.

Check all that apply:

a. <input checked="" type="checkbox"/> Public Water Supply	b. <input checked="" type="checkbox"/> Land Containing Shellfish	c. <input checked="" type="checkbox"/> Prevention of Pollution

2. Commission hereby finds the project, as proposed, is:

**Approved subject to:**

a.  The following conditions which are necessary in accordance with the performance standards set forth in the wetlands regulations. This Commission orders that all work shall be performed in accordance with the Notice of Intent referenced above, the following General Conditions, and any other special conditions attached to this Order. To the extent that the following conditions modify or differ from the plans, specifications, or other proposals submitted with the Notice of Intent, these conditions shall control.

**Denied because:**

b.  The proposed work cannot be conditioned to meet the performance standards set forth in the wetland regulations. Therefore, work on this project may not go forward unless and until a new Notice of Intent is submitted which provides measures which are adequate to protect interests of the Act, and a final Order of Conditions is issued. **A description of the performance standards which the proposed work cannot meet is attached to this Order.**

c.  The information submitted by the applicant is not sufficient to describe the site, the work or the effect of the work on the interests identified in the Wetlands Protection Act. Therefore, work on this project may not go forward unless and until a revised Notice of Intent is submitted which provides sufficient information and includes measures which are adequate to protect the interests of the Act, and a final Order of Conditions is issued. **A description of the specific information which is lacking and why it is necessary is attached to this Order as per 310 CMR 10.05(6)(c).**

3.  Buffer Zone Impacts: Shortest distance between limit of project disturbance and the wetland resource area specified in 310CMR10.02(1)(a).

**C. General Conditions Under Massachusetts Wetlands Protection Act**

**The following conditions are only applicable to Approved projects**

1. Failure to comply with all conditions stated herein, and with all related statutes and other regulatory measures, shall be deemed cause to revoke or modify this Order.
2. The Order does not grant any property rights or any exclusive privileges; it does not authorize any injury to private property or invasion of private rights.
3. This Order does not relieve the permittee or any other person of the necessity of complying with all other applicable federal, state, or local statutes, ordinances, bylaws, or regulations.
4. The work authorized hereunder shall be completed within three years from the date of this Order unless either of the following apply:
  - a. the work is a maintenance dredging project as provided for in the Act; or
  - b. the time for completion has been extended to a specified date more than three years, but less than five years, from the date of issuance. If this Order is intended to be valid for more than three years, the extension date and the special circumstances warranting the extended time period are set forth as a special condition in this Order.
5. This Order may be extended by the issuing authority for one or more periods of up to three years each upon application to the issuing authority at least 30 days prior to the expiration date of the Order.
6. If this Order constitutes an Amended Order of Conditions, this Amended Order of Conditions does not exceed the issuance date of the original Final Order of Conditions.
7. Any fill used in connection with this project shall be clean fill. Any fill shall contain no trash, refuse, rubbish, or debris, including but not limited to lumber, bricks, plaster, wire, lath, paper, cardboard, pipe, tires, ashes, refrigerators, motor vehicles, or parts of any of the foregoing.
8. This Order is not final until all administrative appeal periods from this Order have elapsed, or if such an appeal has been taken, until all proceedings before the Department have been completed.
9. No work shall be undertaken until the Order has become final and then has been recorded in the Registry of Deeds or the Land Court for the district in which the land is located, within the chain of title of the affected property. In the case of recorded land, the Final Order shall also be noted in the Registry's Grantor Index under the name of the owner of the land upon which the proposed work is to be done. In the case of the registered land, the Final Order shall also be noted on the Land Court Certificate of Title of the owner of the land upon

which the proposed work is done. The recording information shall be submitted to the Conservation Commission on the form at the end of this Order, which form must be stamped by the Registry of Deeds, prior to the commencement of work..

10. A sign shall be displayed at the site not less than two square feet or more than three square feet in size bearing the words,

" Massachusetts Department of Environmental Protection"  
[or 'MassDEP']  
File Number : "322-0938"

11. Where the Department of Environmental Protection is requested to issue a Superseding Order, the Conservation Commission shall be a party to all agency proceedings and hearings before Mass DEP.
12. Upon completion of the work described herein, the applicant shall submit a Request for Certificate of Compliance (WPA Form 8A) to the Conservation Commission.
13. The work shall conform to the plans and special conditions referenced in this order.
14. Any change to the plans identified in Condition #13 above shall require the applicant to inquire of the Conservation Commission in writing whether the change is significant enough to require the filing of a new Notice of Intent.
15. The Agent or members of the Conservation Commission and the Department of Environmental Protection shall have the right to enter and inspect the area subject to this Order at reasonable hours to evaluate compliance with the conditions stated in this Order, and may require the submittal of any data deemed necessary by the Conservation Commission or Department for that evaluation.
16. This Order of Conditions shall apply to any successor in interest or successor in control of the property subject to this Order and to any contractor or other person performing work conditioned by this Order.
17. Prior to the start of work, and if the project involves work adjacent to a Bordering Vegetated Wetland, the boundary of the wetland in the vicinity of the proposed work area shall be marked by wooden stakes or flagging. Once in place, the wetland boundary markers shall be maintained until a Certificate of Compliance has been issued by the Conservation Commission.
18. All sedimentation barriers shall be maintained in good repair until all disturbed areas have been fully stabilized with vegetation or other means. At no time shall sediments be deposited in a wetland or water body. During construction, the applicant or his/her designee shall inspect the erosion controls on a daily basis and shall remove accumulated sediments as needed. The applicant shall immediately control any erosion problems that occur at the site and shall also immediately notify the Conservation Commission, which reserves the right to require additional erosion and/or damage prevention controls it may deem necessary. Sedimentation barriers shall serve as the limit of work unless another limit of work line has been approved by this Order.

**NOTICE OF STORMWATER CONTROL AND MAINTENANCE REQUIREMENTS**

19. The work associated with this Order (the "Project") is (1)  is not (2)  subject to the Massachusetts Stormwater Standards. If the work is subject to Stormwater Standards, then the project is subject to the following conditions;
- a) All work, including site preparation, land disturbance, construction and redevelopment, shall be implemented in accordance with the construction period pollution prevention and erosion and sedimentation control plan and, if applicable, the Stormwater Pollution Prevention Plan required by the National Pollutant Discharge Elimination System Construction General Permit as required by Stormwater Standard 8. Construction period erosion, sedimentation and pollution control measures and best management practices (BMPs) shall remain in place until the site is fully stabilized.
- b) No stormwater runoff may be discharged to the post-construction stormwater BMPs unless and until a Registered Professional Engineer provides a Certification that: *i* all construction period BMPs have been removed or will be removed by a date certain specified in the Certification. For any construction period

City/Town:WAYLAND

- BMPs intended to be converted to post construction operation for stormwater attenuation, recharge, and/or treatment, the conversion is allowed by the MassDEP Stormwater Handbook BMP specifications and that the BMP has been properly cleaned or prepared for post construction operation, including removal of all construction period sediment trapped in inlet and outlet control structures; *ii.* as-built final construction BMP plans are included, signed and stamped by a Registered Professional Engineer, certifying the site is fully stabilized; *iii.* any illicit discharges to the stormwater management system have been removed, as per the requirements of Stormwater Standard 10; *iv.* all post-construction stormwater BMPs are installed in accordance with the plans (including all planting plans) approved by the issuing authority, and have been inspected to ensure that they are not damaged and that they are in proper working condition; *v.* any vegetation associated with post-construction BMPs is suitably established to withstand erosion.
- c) The landowner is responsible for BMP maintenance until the issuing authority is notified that another party has legally assumed responsibility for BMP maintenance. Prior to requesting a Certificate of Compliance, or Partial Certificate of Compliance, the responsible party (defined in General Condition 19(e)) shall execute and submit to the issuing authority an Operation and Maintenance Compliance Statement ("O&M Statement") for the Stormwater BMPs identifying the party responsible for implementing the stormwater BMP Operation and Maintenance Plan ("O&M Plan") and certifying the following: *i.*) the O&M Plan is complete and will be implemented upon receipt of the Certificate of Compliance, and *ii.*) the future responsible parties shall be notified in writing of their ongoing legal responsibility to operate and maintain the stormwater management BMPs and implement the Stormwater Pollution Prevention Plan.
- d) Post-construction pollution prevention and source control shall be implemented in accordance with the long-term pollution prevention plan section of the approved Stormwater Report and, if applicable, the Stormwater Pollution Prevention Plan required by the National Pollutant Discharge Elimination System Multi-Sector General Permit.
- e) Unless and until another party accepts responsibility, the landowner, or owner of any drainage easement, assumes responsibility for maintaining each BMP. To overcome this presumption, the landowner of the property must submit to the issuing authority a legally binding agreement of record, acceptable to the issuing authority, evidencing that another entity has accepted responsibility for maintaining the BMP, and that the proposed responsible party shall be treated as a permittee for purposes of implementing the requirements of Conditions 19(f) through 19(k) with respect to that BMP. Any failure of the proposed responsible party to implement the requirements of Conditions 19(f) through 19(k) with respect to that BMP shall be a violation of the Order of Conditions or Certificate of Compliance. In the case of stormwater BMPs that are serving more than one lot, the legally binding agreement shall also identify the lots that will be serviced by the stormwater BMPs. A plan and easement deed that grants the responsible party access to perform the required operation and maintenance must be submitted along with the legally binding agreement.
- f) The responsible party shall operate and maintain all stormwater BMPs in accordance with the design plans, the O&M Plan, and the requirements of the Massachusetts Stormwater Handbook.
- g) The responsible party shall:
1. Maintain an operation and maintenance log for the last three (3) consecutive calendar years of inspections, repairs, maintenance and/or replacement of the stormwater management system or any part thereof, and disposal (for disposal the log shall indicate the type of material and the disposal location);
  2. Make the maintenance log available to MassDEP and the Conservation Commission ("Commission") upon request; and
  3. Allow members and agents of the MassDEP and the Commission to enter and inspect the site to evaluate and ensure that the responsible party is in compliance with the requirements for each BMP established in the O&M Plan approved by the issuing authority.
- h) All sediment or other contaminants removed from stormwater BMPs shall be disposed of in accordance with

all applicable federal, state, and local laws and regulations.

- i) Illicit discharges to the stormwater management system as defined in 310 CMR 10.04 are prohibited.
- j) The stormwater management system approved in the Order of Conditions shall not be changed without the prior written approval of the issuing authority.
- k) Areas designated as qualifying pervious areas for the purpose of the Low Impact Site Design Credit (as defined in the MassDEP Stormwater Handbook, Volume 3, Chapter 1, Low Impact Development Site Design Credits) shall not be altered without the prior written approval of the issuing authority.
- l) Access for maintenance, repair, and/or replacement of BMPs shall not be withheld. Any fencing constructed around stormwater BMPs shall include access gates and shall be at least six inches above grade to allow for wildlife passage.

**Special Conditions:**

SEE ATTACHMENT FOR SPECIAL CONDITIONS ISSUED BY THE WAYLAND CONSERVATION COMMISSION PURSUANT TO THE WETLANDS PROTECTION ACT (310 CMR 10.0).

**D. Findings Under Municipal Wetlands Bylaw or Ordinance**

1. Is a municipal wetlands bylaw or ordinance applicable?  Yes  No

**2. The Conservation Commission hereby (check one that applies):**

a.  DENIES the proposed work which cannot be conditioned to meet the standards set forth in a municipal ordinance or bylaw specifically:

1. Municipal Ordinance or Bylaw \_\_\_\_\_

2. Citation \_\_\_\_\_

Therefore, work on this project may not go forward unless and until a revised Notice of Intent is submitted which provides measures which are adequate to meet these standards, and a final Order or Conditions is issued. Which are necessary to comply with a municipal ordinance or bylaw:

b.  APPROVES the proposed work, subject to the following additional conditions.

1. Municipal Ordinance or Bylaw WETLANDS AND WATER RESOURCES PROTECTION BYLAW

2. Citation CHAPTER 194

3. The Commission orders that all work shall be performed in accordance with the following conditions and with the Notice of Intent referenced above. To the extent that the following conditions modify or differ from the plans, specifications, or other proposals submitted with the Notice of Intent, the conditions shall control.

The special conditions relating to municipal ordinance or bylaw are as follows:

SEE CHAPTER 194 FOR SPECIAL CONDITIONS ISSUED BY THE WAYLAND CONSERVATION COMMISSION PURSUANT TO THE WETLANDS AND WATER RESOURCES PROTECTION BYLAW.

**F. Appeals**

The applicant, the owner, any person aggrieved by this Order, any owner of land abutting the land subject to this Order, or any ten residents of the city or town in which such land is located, are hereby notified of their right to request the appropriate MassDEP Regional Office to issue a Superseding Order of Conditions. The request must be made by certified mail or hand delivery to the Department, with the appropriate filing fee and a completed Request for Departmental Action Fee Transmittal Form, as provided in 310 CMR 10.03(7) within ten business days from the date of issuance of this Order. A copy of the request shall at the same time be sent by certified mail or hand delivery to the Conservation Commission and to the applicant, if he/she is not the appellant.

Any appellants seeking to appeal the Department's Superseding Order associated with this appeal will be required to demonstrate prior participation in the review of this project. Previous participation in the permit proceeding means the submission of written information to the Conservation Commission prior to the close of the public hearing, requesting a Superseding Order, or providing written information to the Department prior to issuance of a Superseding Order.

The request shall state clearly and concisely the objections to the Order which is being appealed and how the Order does not contribute to the protection of the interests identified in the Massachusetts Wetlands Protection Act

Signature of Applicant

Rev. 4/1/2010

**Wayland Conservation Commission**  
**Attachment to Order of Conditions**  
 to accompany Mass. Wetlands Prot. Act M.G.L. c. 131, §40 Order of Conditions

**Date of Issue: January 11, 2021**

**Applicant: Paul Brinkman**

**Owner: Wayland Department of Public Works**

**Project Location: Route 20 Public Right-of-Way  
 (Andrews Avenue to 490 Boston Post Road)**

**Map and Lot Number(s): N/A – Public Right-of-Way**

**Project Description:**

The location subject to this Amended Order of Conditions (AOOC) is the Route 20 public right-of-way from approximately the intersection of Andrews Avenue and Route 20 to 490 Boston Post Road (the Project Locus). The Project Locus generally consists of a bituminous concrete roadway, vegetated roadway shoulders, a culvert under the jurisdiction of the Massachusetts Department of Transportation (MassDOT), and a bridge spanning the Sudbury River. Riverfront Area (RFA) associated with the Sudbury River and Buffer Zones associated with adjacent Bordering Vegetated Wetlands (BVW) encompass the Project Locus. Other adjacent resource areas Subject to Protection under the Wetlands Protection Act (M.G.L. ch. 131 §40) (the Act) and the Wayland Wetlands and Water Resources Bylaw (Chapter 194) (the Bylaw) consist of Bordering Vegetated Wetland (BVW), Land Under Water (LUW), Bank, and Bordering Land Subject to Flooding (BLSF).

Work previously approved under the Order of Conditions (OOC) associated with DEP File #322-938 consists of the following:

- Installation of 3,000 linear feet of 12- and 8-inch ductile iron water mains and associated valves and fittings;
- Installation of hydrants;
- Installation of a water main within an existing utility bay affixed to the underside of the bridge spanning the Sudbury River, and;
- Directional drilling under a MassDOT culvert to facilitate the installation of the water main.

New work proposed under this AOOC consists of the following:

- Installation of 2,500 linear feet of a High Density Polyethylene (HDPE) wastewater carrier pipe that will be generally parallel to the existing work, but located primarily within the eastbound lane of Route 20;
- Placement of force mains within the aforementioned carrier pipe, and;
- Construction of a submersible grinder pump station.

**Plans and Documents:**

The Commission voted to approve the following site plans and documents subject to the pre-construction conditions required in Condition 39 below:

1. *Town of Wayland Boston Post Road (Route 20) Conceptual Sewer Design*; prepared by Tata & Howard; dated January 2021; signed and stamped by James V. Hoyt, P.E. 49891; sheets C-1 through C-5.
2. *Subject: Amendment for WPA Permit #322-0938 Phase III Water Main (Route 20)*; prepared by Paul Brinkman, Town Engineer; dated November 16, 2020.

## Wayland Conservation Commission Attachment to Order of Conditions

to accompany Mass. Wetlands Prot. Act M.G.L. c. 131, §40 Order of Conditions

### Critical Dates:

1. This Order of Conditions is valid for **three (3) years from the original date of issuance.**

Expiration date: **June 4, 2022.**

### Findings:

8. An OOC for approved work under DEP File #322-938 was issued by the WCC on June 4, 2019, of which the Attachment to OOC document contained Findings 1 through 7 and Conditions 20 through 36. The issuance of this AOOOC does not and shall not be construed in any way to invalidate or supersede the Findings and/or Conditions set forth in the original OOC dated June 4, 2019. All previous Findings and Conditions, as well as all Findings and Conditions described in this AOOOC, apply to the approved work performed under DEP File #322-938. Additional Findings and Conditions included herein are pursuant to the additional scope of work presented by the request for an AOOOC. In the event of a conflict, this document shall control.
9. The issuance of this AOOOC does not alter the original expiration date of June 4, 2022 associated with the original OOC.
10. The Wayland Department of Public Works (the Applicant) filed a request for an AOOOC with the WCC on November 16, 2020. The scope of work under the AOOOC consists of those activities described above in addition to the work originally approved under DEP File #322-938.
11. The WCC finds that the work proposed under this AOOOC is Subject to Jurisdiction under the Act and Bylaw. The Project Locus has been found to be significant to all of the interests noted on Page 2 of the original OOC, with no rebuttal to the contrary provided by the Applicant.
12. The WCC finds that the portion of RFA in which work is proposed is considered degraded per 310 CMR 10.58(5).
13. The WCC finds that work over the Sudbury River is subject to review by the Division of Fisheries and Wildlife through the Natural Heritage and Endangered Species Program due to the presence of mapped Priority and Estimated Habitat associated with three (3) state-listed endangered species and one (1) state listed species of special concern. Therefore, no construction work within the riverfront area can occur during nesting season from April 15 through August 15.
14. The WCC finds that BVW is the only Resource Area Subject to Protection under the Act and Bylaw that has been delineated and survey-located in the field. No formal assessment of any additional Resources Areas Subject to Jurisdiction under the Act and Bylaw has been performed.
15. A separate Amended Chapter 194 Bylaw permit for the work permitted by this AOOOC is issued pursuant to Wayland's Wetlands and Water Resources Bylaw. This permit includes additional conditions not listed in this Order that require compliance.

### Conditions:

**Note: These Conditions are issued under the Massachusetts Wetlands Protection Act. Numbering begins with #39, to be consecutive and integrated with the Conditions issued under the state Wetlands Protection Act and the original OOC dated June 4, 2019. Conditions #1-39 are not invalidated by the issuance of this AOOOC.**

#### **Before Project Begins (Prior to any Alteration):**

39. **A site meeting with an Agent of the WCC and agreement upon/proof of the following must occur before any work may commence on the site.**
  - A. **Final Site Plans/documentation:**
    - 1) The Applicant shall provide revised engineered site plans to the WCC if the plans are modified prior to the start of work.

## Wayland Conservation Commission Attachment to Order of Conditions

to accompany Mass. Wetlands Prot. Act M.G.L. c. 131, §40 Order of Conditions

2) The Applicant is responsible for coordinating any notification of this AOOO scope of work with the MA Division of Fisheries and Wildlife.

B. **Erosion controls** shall be installed at the newly expanded limit of work, as identified on the requested site plan and will include either straw wattles (12" diameter) or compost filled tubes. Erosion controls must be **inspected and approved** by the Agent prior to commencing work.

C. **Contact information** shall be provided to the Agent including a written list of names, addresses, business phone numbers, and mobile phone numbers of the project supervisor who will be responsible for ensuring on-site compliance with this AOOO and his/her alternate, including 24-hour contact information of the person responsible for the site.

D. Proof that a **copy of the specific project plans, specifications, and this AOOO has been provided to the Contractor**. The plans and the original OOC, as well as this AOOO, must be available at all times at the work site for reference. These documents shall be included in all contracts and subcontracts dealing with the work proposed and shall supersede any conflicting contract requirements.

E. **Limit of work line** for this project is considered to be the location of the newly expanded erosion control barrier. No work may be performed beyond the limit of work line.

F. **Additional approvals:** No increase in impervious surfaces within Buffer Zone or RFA beyond what is shown on the plans-of-record is permitted without prior WCC approval.

G. **Emergency supplies:** The Applicant must keep a stockpile of the approved erosion control materials on-site in the event of erosion control failure or the requirement for additional erosion controls as directed by the Agent.

H. **Start of Work Notification:** The applicant or contractor shall submit notification to the WCC not less than two (2), or more than five (5) business days before construction commences.

I. **A separate Bylaw decision for the work permitted by this Order of Conditions was issued pursuant to Wayland's Wetlands and Water Resources Bylaw Chapter 194. That decision contains conditions not listed in this decision that the Applicant must follow per requirements of the Bylaw.**

J. **Appeal Period:** No work related to the AOOO shall begin until the ten-day appeal period has expired for this AOOO.

K. A copy of the original OOC, this AOOO, and the NOI application (including the final approved plans-of-record) shall be included in the bid document.

### During Construction

40. **Order of Conditions prevails:** Except where modified by these Conditions, all work must be performed in accordance with the plans outlined by the applicant and referenced on Page 1 of this AOOO. Where a conflict exists between the referenced plans and these Conditions, the Conditions will govern.

41. **Stop Work Orders:** An Agent of the WCC shall have the right to halt all or a portion of the work on the site if the Agent determines that any of the work is not in compliance with the original OOC or this AOOO. Work shall not resume until the WCC is satisfied that the work will comply and has so notified the Applicant in writing.

42. **Turbidity Curtain:** It is the understanding of the WCC that all work on the bridge spanning the Sudbury River has been completed under the original OOC. Should any work on this bridge be necessitated, the Applicant shall contact the WCC in writing to determine if additional permitting is required. If the work is permissible under existing approvals, a turbidity curtain shall be installed within the Sudbury River at the WCC Agent's discretion.

## Wayland Conservation Commission Attachment to Order of Conditions

to accompany Mass. Wetlands Prot. Act M.G.L. c. 131, §40 Order of Conditions

43. **Directional Drilling:** The use of directional drilling at the location of the MassDOT culvert will result in a lesser amount of exposed soils compared to trenching. A detailed directional drilling plan must be submitted by the Applicant to the WCC to ensure the containment of slurry and blowouts. This plan must contain information including, but not limited to: composition of the slurry, containment methods, the type of drill used, and any required staging.
44. **Dewatering:** It is anticipated that the Project will require dewatering associated with the directional drilling of the carrier pipe under the MassDOT culvert. In the event that dewatering is required, the Applicant shall submit a standalone plan to the WCC/Agent for review no less than two (2) business in advance of its proposed implementation. Approval of this plan must be granted by the Agent prior to commencing dewatering operations.
45. **Work must conform to the limit of work:** At no time shall work, disturbance, alteration, or heavy equipment operation occur beyond the newly approved erosion control barriers. The expanded erosion control barrier shall serve as the limit of work. No construction materials, stockpiled soil or fill, debris, brush, leaves, or other materials may be placed beyond the limit of work.

### Upon Completion of Project

46. **Removal of erosion controls:** With the approval of the WCC or its Agent, erosion control devices associated with the expanded work may be removed from the Project Locus when the surface is permanently stabilized, and seed has germinated.
47. **Notification of completion of the Project/Request for Certificate of Compliance:** Within thirty (30) calendar days of completion of the Project, the Applicant shall make a written request to the WCC for a Certificate of Compliance (Form WPA 8A) and shall submit the following items with the request:
  - A. **Two sets of As-Built Plans** (in 11 x 17" format) and one large scale plan showing the locations of all completed work approved under the original OOC and this AOOC.
  - B. **Photographs:** Post-construction photographs shall be submitted with the COC request.
  - C. **Compliance report** and detailed narrative prepared by a Professional Engineer registered in Massachusetts certifying compliance with both the original OOC and this AOOC. Any conditions not in compliance shall be addressed. Any deviations or changes to the approved plans shall be described for review by the WCC.
  - D. **An electronic copy** of the compliance report and any plans shall be submitted electronically to the Conservation@wayland.ma.us (if this is not possible please contact the WCC).

**Wayland's Wetlands and Water Resources Protection Bylaw**  
**AMENDED CHAPTER 194 PERMIT**  
**Water Main Improvement Projects, January 11, 2021**  
**(Also DEP file 322-938)**

**Applicant/Owner Address:** MassDOT and Town of Wayland Department of Public Works  
66 River Road, Wayland, MA

**Deed Reference:** Route 20 (Boston Post Road) in Wayland, MA

**Project Description:** This Permit provided approval for the installation of a water main along Route 20 and consisted of furnishing and installing approximately 3,000 linear feet of 12-inch and 8-inch diameter ductile iron water main with associated valves, fittings, hydrants, and appurtenances including a bridge crossing where the water main will be hung in an existing utility bay under the MassDOT bridge and a directional drill below an existing culvert. This Permit was amended to provide approval for the installation of a wastewater carrier pipe along this same stretch of Route 20 although located primarily along the eastbound lane.

**Plan Reference/s:**

1. Town of Wayland 2019 Water Main Improvements (Route 20)-sheets C-1 thru C-6 and S-1 thru S-6, prepared by Tata & Howard, dated March 21, 2019, signed and stamped by Ryan P. Neyland (P.E. no. 48460), scale: various.
2. Notice of Intent for Phase III Boston Post Road (Route 20) Water Main Improvements, prepared by Tata & Howard, dated March 22, 2019.
3. Town of Wayland Boston Post Road (Route 20) Conceptual Sewer Design – cover sheet and sheets C-1 through C-5, prepared by Tata & Howard, dated January 2021, signed and stamped by James v. Hoyt, P.E. 49891, scale: various.

**The work shall conform to these specifications *except* as herein conditioned.**

**Decision:** The Wayland Conservation Commission (hereinafter "Commission") voted to issue a Chapter 194 permit approving the proposed work, as conditioned herein pursuant to Chapter 194. **No work shall begin until the appeal period has expired for the Order of Conditions issued pursuant to the Wetlands Protection Act.** This permit is subject to the conditions noted below and based upon the findings listed below thereafter. The Commission finds that the conditions are necessary, in accordance with the provisions of Chapter 194, to protect those interests noted in the findings. **There is a requirement for inspections performed by a Professional Engineer (hereinafter "P.E.") or Professional Land Surveyor (hereinafter "P.L.S.")).** **The applicant is responsible for ensuring that the inspections are conducted and site inspection reports are submitted to the Commission as outlined in the "Reporting Requirements" herein.**

**Special Conditions Issued by the Wayland Conservation Commission:**  
**(All conditions from the original permit are included here)**

**CONDITIONS TO BE MET BEFORE COMMENCING WORK:**

1. **Prior to commencing any work**, the applicant shall provide *written notice*, not less than two or more than five business days prior to commencing any activity permitted by this Permit, to the file. Work within the Riverfront shall not be done between April 15 and August 15 to protect the habitat of endangered and threatened species.
2. **Prior to commencing any project work**, the applicant shall submit revised engineered site plans to the Conservation Commission if the plans are modified prior to the start of work.
3. **Prior to commencing any work**, the applicant shall provide the name of the person responsible for all on-site erosion controls, the name of the person who shall make the inspection of the sediment barriers and the name of any alternate.
4. **Prior to commencing any work at the site**, the Commission or Conservation Administrator shall inspect the sediment barriers once they have been installed to ensure that the barriers have been properly installed.

**REPORTING REQUIREMENTS:**

5. **There shall be at least one site inspection done which shall take place within thirty (30) days or sooner after work has started on the site.** The applicant shall have a site inspection (performed during work hours at the site) by a Registered P.E., to determine if all work is being performed in compliance with this Permit. Thereafter, the applicant shall submit a written report to the file, from the Registered P.E. certifying that, to the best of his/her knowledge and belief based upon the site inspection, the work is being done in compliance with this Permit. The inspection report shall include the date and time of the inspection. If the work is not in compliance, the report will list the deviation/s from the Permit and the corrective action/s taken (or planned). A final inspection report shall also be submitted to the Commission as part of the Certificate of Compliance process.
6. The required reports shall be submitted within five business days after the inspection.
7. **All written submissions to the Commission shall include: a date, the DEP File Number and the condition or conditions that the submission is intended to meet.** Failure to comply with this requirement may result in an incomplete file and adversely impact consideration of a Certificate of Compliance.
8. A copy of this Permit shall be provided to the project supervisor and shall be available on the site at all times during construction. **The contractor doing the work under this Permit is responsible for compliance with conditions of this permit.**

**CONDITIONS TO BE MET DURING THE PROJECT:**

9. No changes to the site specific project plans are allowed after the plans have been approved by the Commission without further approvals. Changes to address site conditions shall require the applicant to notify the Agent of the Commission before implementing the change. Changes in the scope of the project shall require additional approvals from the Commission or a decision whether the change is significant enough to require an amendment of this Permit or the filing of a new application.

10. The work authorized hereunder shall be completed within three years from the date of this permit unless extended pursuant to Chapter 194. *Any extension sought must be done in compliance with this permit and before this permit expires.*
11. This permit may be extended by the Commission for one or more periods of up to three years each upon application to the Commission at least 30 days prior to the expiration date of the decision.
12. This permit does not relieve the permittee or any other person of the necessity of complying with all other applicable federal, state, or local statutes, ordinances, bylaws, or regulations.
13. This Permit does not grant any property rights or any exclusive privileges; it does not authorize any injury to private property or invasion of property rights.
14. Any backfill used in connection with this project shall be clean fill. Any backfill shall contain no trash, refuse, rubbish, or debris, including but not limited to wood, lumber, **asphalt**, bricks, concrete, plaster, electronic and computer components, wire lath, paper, cardboard, pipe, tires, ashes, refrigerators, motor vehicles, or parts of any of the foregoing.
15. This permit incorporates the conditions listed in DEP File 322-938 as conditions for approval pursuant to Chapter 194 in addition to the conditions listed in this decision. Failure to comply with a condition shall be deemed a violation of Wetlands and Water Resources Protection Bylaw Chapter 194.
16. **Tracking on the paved road/street shall be avoided.** The paved road/street shall be swept daily as needed for any tracking from the on-site activities. Any evidence of failure to comply with this condition may result in the issuance of a stop-work order.
17. The installation of sediment barriers shall be done by hand or with equipment designed to minimize the amount of land disturbed. Heavy equipment shall not be used to install sediment barriers. *The Commission permits the use of an alternative sediment barrier providing they have been approved by the Commission in advance of it being installed.*
18. Sediment barriers shall be straw wattles or compost tubes, unless an alternative has been approved prior to installation by the Commission, and shall be installed in the location shown on the site specific project plan. Straw wattles shall be staked. The applicant shall document that the sediment barriers were installed in the proper location.
19. A small supply of sediment barriers shall be stockpiled for emergency use only. The applicant shall immediately contact the Commission AND control any erosion/sedimentation problems that occur on the site. The need for any additional erosion/sedimentation controls found to be necessary by either the applicant or the Commission during construction shall be implemented by the applicant.
20. Failure to comply with all conditions stated herein, and with all related statutes and other regulatory measures, shall be deemed cause to revoke or modify this Permit.
21. No permanent drainage structure shall be used as a temporary sedimentation basin or for erosion control during construction.
22. Any excess excavated material shall be removed from the site and disposed of legally. Evidence shall be provided when the Certificate of Compliance request is provided demonstrating compliance with this condition. The applicant shall demonstrate that all discarded pipe, asphalt, etc. were legally disposed of within 90 days of notice to start work. Failure to provide this documentation shall impact the issuance of a Certificate of Compliance.
23. There shall be no stockpiling of soil or other materials within 100 feet of any pond, stream, or wetland area except as depicted on the site project plans. Any erodible material stockpiled

overnight shall be covered with plastic or canvas, or stabilized in a manner acceptable to the Commission to prevent soil from entering any resource area. Stockpiles shall also be contained with straw bales around the perimeter or down gradient side of the pile. Trenches shall be opened and filled on the same day. Stockpiling shall be minimized.

24. All disturbed or exposed areas shall be brought to final finished grade and stabilized with either asphalt or loam and seed. The seed mix shall be a native variety.
25. There shall be no change in grade allowed with this permit.
26. A floating turbidity curtain shall be installed downstream and around the work area for the duration of **ANY** in-water work under the bridge. The exact location of the turbidity curtain shall be determined prior to the start of work.
27. All drilling fluids generated from drilling holes through the existing concrete beams shall be containerized and not allowed to discharge to any resource areas.
28. The contractor shall follow all the protocols and procedures for directional drilling as described in the NOI application to minimize any impact to the adjacent resource areas.
29. Fluids generated from disinfecting the water main after installation shall not be discharged to any resource area. These fluids shall be containerized and properly disposed.
30. Prior approval by the Commission shall be required for any tree removal (> 6 inch DBH) within wetland buffer areas or riverfront zones.
31. Any catch basins on or adjacent to and down gradient from the project site shall be protected by SiltSacks while work is ongoing. SiltSacks shall be maintained and regularly cleaned of sediments until all areas associated with the permitted work by have been permanently stabilized. **They shall be monitored at least weekly and after major (.5" in 24 hrs) storm events to ensure proper function and removed immediately after construction has been completed.**
32. Equipment shall not be refueled or serviced within 100 feet of the wetlands and any other resource area or within the buffer zone except as conditioned herein. **The Commission may permit, on a restricted basis, some refueling within the buffer zone, if a spill containment kit is provided on the site at all times.**
33. There shall be no more than a total of 50 gallons of flammable or combustible chemicals relating to this project stored on the site at any one time. No routine servicing of vehicles used for this project shall be permitted on the site. The Commission shall be notified prior to initiating any emergency repair on the site.
34. Any dewatering or draw down activities shall not be directly discharged into a resource area or catch basin. The Commission's approval does not alter the need for the work to be conducted in compliance with State or Federal regulations and permitting applicable to construction dewatering. **Any dewatering shall be approved, in advance, by the Commission or Conservation Administrator. Thereafter, prior to commencing any dewatering the contractor shall provide 24 hours written notice (excluding holidays and weekends) to the Conservation Administrator.**
35. No permanent drainage structure shall be used as a temporary sedimentation basin or for erosion control during construction.

**CONDITIONS TO CONTINUE IN PERPETUITY: These conditions shall remain in force permanently and be recorded on the Certificate of Compliance.**

36. No dumping of debris is permitted within 100' of a wetland or stream. Any existing material within the buffer zone shall be removed.
37. No pesticides, herbicides or insecticides shall be used on the grounds located within the 100-foot wetland buffer zone or riverfront resource area, except with the prior written permission of the Commission.

**CONDITIONS ADDRESSING PROJECT COMPLETION:**

38. The Commission and/or Conservation Administrator may require the removal and dispersal of the erosion controls after the site has been fully stabilized to their satisfaction. Sediment barriers may also be removed if, upon a required site inspection, the P.E. or P.L.S. has certified that the site is permanently stabilized.
39. The applicant shall submit a request for a Certificate of Compliance not less than 60 days before this decision expires. ***This is a mandatory step in the process of file closure for this matter.*** The request for Certificate of Compliance shall include the following items:
  - a. The request for a Certificate of Compliance shall be submitted with a **detailed narrative** (the signed original and two copies) prepared and stamped by a P.E. or P.L.S. registered in the Commonwealth of Massachusetts, which lists the conditions that were **NOT** complied with and the reasons for non-compliance and details the manner and extent of any deviations from compliance with any condition, shall be submitted with a request for a Certificate of Compliance. This narrative shall certify compliance with the approved plans referenced above and setting forth any deviation/s that exist with a note as to how it/they may be corrected. Work that is not complete shall be detailed in a schedule of planned completion dates prior to expiration of the Order with a certification to the commitment of resources by an authorized official representative of the applicant to complete the work prior to expiration of the Order.
  - b. Two sets of as-built site plans in 11x17 format and one large scale plan shall be prepared and stamped by a registered P.L.S. or registered P.E. showing the location of the water mains and any grading changes for projects that differ from the approved plans. The plans shall be based upon the NGVD datum and indicated on each plan.
  - c. A copy of narrative and the as built plans shall be submitted electronically or may be e-mailed to the [Conservation@wayland.ma.us](mailto:Conservation@wayland.ma.us)
  - d. A Chapter 194 Form properly filled out for a Certificate of Compliance.

**This decision is not valid without a signature sheet.  
The page numbering does not include the signature sheet.**

This Permit expires on June 4, 2022  
If necessary, an extension must be filed by May 4, 2022

**Findings:**

- a. Chapter 194 requires filing an application for any work to be done in a resource area – work is proposed in Vegetated Wetlands and Riverfront and their Buffer Zones, Bank, and Land Under Water. Much of the impacts related to the water main installation will be temporary.
- b. The Sudbury riverfront area is within the mapped Priority and estimated Habitat for three stated listed endangered species and one state listed species of Special Concern. No work in the Riverfront area can occur during nesting season from April 15 through August 15.

- c. This decision does not define the limits of resource areas regulated by the Bylaw.
- d. These resource areas identified have values relating to: the protection of public and private water supplies, prevention of pollution, wildlife habitat, prevention of flooding, prevention of storm damage, protection of ground water, unusual plants, wildlife, wildlife habitat, and passive recreation.
- e. A public hearing was opened on April 25, 2019 and closed on May 9, 2019. The public hearing for the amendment request was opened and closed on November 18, 2020.
- f. The minutes of the hearings are incorporated as part of the record for this decision.
- g. This decision shall run concurrently with the Order of Conditions issued pursuant to the Wetlands Protection Act for DEP File 322-938.
- h. The requirements and findings of this permit are consistent with the provisions of Chapter 194 and are intended to provide greater protection of the buffer zone than the Order of Conditions. As noted above, the buffer zone is a resource area as defined by Chapter 194.
- i. The Commission requires the replacement of any tree cut that is greater than 6" diameter at breast height (dbh). Any tree meeting these criteria must be replaced according to the Commission's Replacement Tree and Shrub requirements.
- j. Sediment barriers will be required until disturbed areas within 100 feet of the wetlands and riverfront are permanently stabilized.
- k. Since there has been no formal determination of the extent of jurisdiction of activities on the site pursuant to Chapter 194, excess excavated material will be removed from the buffer zone. The Commission will require documentation of compliance with this requirement.
- l. A growing season, for the purposes of interpreting this Permit, is considered April through October of any given year.
- m. Discharges to a river, wetlands or drainage system, if not properly permitted by DEP or EPA, are prohibited.
- n. During construction, precautions must be taken to avoid accidental spills of oils or hazardous materials in or near the wetlands or other resource areas. Precautions include limiting where equipment is serviced and refueled, having spill containment kits at the site, and taking steps to avoid spills and accidents.
- o. Projects covered by a Chapter 194 Permit meet Chapter 193 requirements.
- p. **Any deviation from the approved, project specific plans will require a formal determination by the Commission as to whether this decision may be modified or a new filing will be required.**
- q. Failure to comply with the conditions of this permit is a violation of the Wetlands Bylaw. Violations of Chapter 194 may result in the imposition of non-criminal penalties in the amount of \$300 in addition to other remedies available. Each day the violation exists may be considered a separate violation of the Bylaw.
- r. Site plans are required to be based upon the National Geodetic Vertical Datum (NGVD).
- s. Water quality will be impacted if the catch basins down gradient from the work are not protected while construction activity occurs at the site.
- t. Submission of as-built plans showing significant deviations from the approved plan may result in a requirement to file a new application, enforcement action, or other actions as deemed appropriate by the Commission.
- u. Any required approval by the Commission may be provided within 21 business days unless additional information is requested.
- v. Any required approval or action by the Conservation Administrator may be taken within 12 business days unless additional information is requested.
- w. The Commission may consider revoking this permit in the event the material presented during the hearing and/or on the plans is found to be different from material provided to another Board, Commission or official for work other than that described to the Commission during the public hearings.
