

Wayland Conservation Recommended Bird Seeds:

To attract a higher diversity of birds to your feeder, we recommend high-quality seed mixes that include real nuts such as peanuts, sunflower seeds, and pumpkin seeds, and avoid filler ingredients such as millet and corn. Here are some examples:

Black Oil Sunflower Seed

Mealworms are a bird's favorite treat and high in precious protein

Shelled Peanuts

Suet Cakes can be an important source of fat for overwintering birds

Fruit Blend with raisins, pistachios, sunflower kernels, cranberries, and pumpkin seed.
